I am writing to testify that I, and many of my friends and classmates are firmly against the landfill expansion.

The landfill expansion will only worsen the already terrible environmental impacts on my community like water contamination, methane emissions, and forever chemicals in the soil. These are things that as a young person in the community cannot look past because if the landfill expands it'll be something I have to live with my whole life. It won't be someone else's problem, it will directly affect me and my friends for years to come.

The landfill cannot expand if Republic Services really has this community in mind.
