RE: LU-24-027, Coffin Butte Landfill Expansion CUP Application

Dear Board of Commissioners,

Thank you for your attention to the potential expansion of the Coffin Butte landfill and its cumulative effects on the future and livability of Benton County. I urge you to validate the tremendous work of your Planning Commission and deny issuance of a Conditional Use Permit.

The overarching Benton County Comprehensive Plan and Oregon Land Use laws provide the context from which Development Code is derived. These documents provide the intent from which staff should evaluate applicable Development criteria. However, arguments put forth by the applicant, proponents, and staff ignore the intent of the relevant criteria, acting as if intent is unknown. The commitments made by Benton County through its Comprehensive Plan towards local area resource protections provide clear intent.

County staff are responsible for making certain that as many of these commitments are met as possible in their permit review. Clearly they have not even considered many, listed below, in regard to the Oregon E.E. Wilson Wildlife Area, adjacent to and downstream of much of the landfill ownership, and zoned as Open Space:

Policies

5.1.2 Benton County shall work to maintain and enhance ecological health of valued natural areas throughout the county by preserving and restoring natural habitats and maintaining the integrity and stability of these areas.

5.3.1 Benton County shall work with public and private organizations, landowners, and the general public to identify, record, and protect valued scenic and open space resources.

5.4.1 Benton County shall recognize the need for protection of open spaces, especially along natural drainage courses.

5.4.2 Benton County shall promote private land stewardship of farm and forest lands, respect private property rights, and work with non-profit groups and others to maintain a comprehensive system of connected open spaces that will protect the most valued natural, scenic, and recreational areas of the county.

5.4.3 Benton County shall work to protect ecological and hydrological functions of open space, promoting best management practices and green infrastructure.

5.6.7 Benton County's riparian planning process shall place particular emphasis on identifying and protecting headwater areas from adverse impacts of development.

5.7.4 Benton County shall work with others to conserve and protect natural functions of the county's most important wetland habitats.

5.9.1 Benton County shall actively participate with appropriate local, state, and federal agencies to identify, conserve, and protect fish and wildlife habitat.

5.9.4 In making land use decisions, Benton County shall protect identified sensitive wildlife habitat types and wildlife corridors from adverse impacts.

5.9.5 Benton County shall notify the Oregon Department of Fish and Wildlife (ODFW) early in the review process and collaborate with that agency regarding zone and plan amendments, conditional use permits, and subdivision and series partition applications in areas that include habitat types identified by ODFW as Habitat Conservation Priorities: in-stream habitat, native prairie grasslands, oak woodlands and savannas, riparian floodplains and wetlands.

5.9.7 Benton County shall coordinate with Oregon Department of Fish and Wildlife to minimize conflicts between transportation infrastructure and wildlife migration routes.

In summary, County Development staff have not acted within the policy constraints and intent of the County Comprehensive Plan in making its recommendation.

Firstly, with the absence of a public record of staff communications or consideration of *any* of these Comprehensive Plan policies, I urge the Board of Commissioners to deny permit issuance, and uphold the findings of its Planning Commission.

Secondly, if there is any record of early communications or collaborative work with ODFW and E.E. Wilson management area staff regarding wetland, waterway, scenic or wildlife habitat, those must be immediately made a matter of this public record.

Lastly, the Board of Commissioners should now determine this CUP application clearly conflicts with Comprehensive Plan policies, and affirm its denial.

Sincerely,
Jim Fairchild
