Dear Commissioners,

I have lived in the Soap Creek Valley for over 37 years and as I have stated before we have seen many of our neighbors die of cancer.

We have seen our friends die of brain cancer, bone cancer, breast cancer, bladder cancer, lung cancer and gall bladder cancer.

We know the landfill has toxins which spread by air and get into the soil and water.

My question to all of you; Can Republic confirm the cancers we have out here have nothing to do with the toxins they dumped into the landfill?

I have attached an unofficial map I drew up a few years ago of neighbors I know who have had cancer.

It is just a small section of our valley near to where I live.

I urge you to oppose the expansion of this landfill!

Thank you for your consideration,

Sincerely,

Vicki Idema
