Written Testimony:

I'd like to testify in support of the expansion permit to be approved for the Coffin Butte landfill project. I believe this will minimize the environmental impact over the alternate of transporting to a distant location. This transport will increase the fuel used, wear and tear on our roadways, time of personnel to transport, increased risk over a longer transport route, and of course, increase fees to our citizens. This may have other detrimental environmental issues from people doing illegal dumping in our natural areas. I believe the approval of the expansion will provide the additional time to allow our communities in partnership with the landfill to find better alternatives that do not increase the risks and costs of remote transportation. Thank you, Harry Myers
