

LU-24-027 IN-PERSON TESTIMONY SUBMITTAL COVER SHEET

Received From: Pam Castle

Date: Oct 23 2025

Email: pcastle @ gettysburg.edu

Phone: 717-404-6895

Address: 993 NW Cypress Avenue

City, State, Zip: Corvallis, OR 97330

FOR BOC OFFICE STAFF USE ONLY

BOC ID: 302

IDENTIFIER: T0687

Pam Castle – 993 NW Cypress Avenue Corvallis

I have a master's degree in toxicology and taught college level biology, genetics, chemistry, and organic chemistry for at least 20 years. This job required that I maintain a solid ability to locate and understand scientific literature in a wide variety of topics.

Adjacency

- Adjacency in this context must account for the far-reaching effects of operating a landfill in this location.
 - I note the location because of the large amount rainfall CBL receives results in a large amount of leachate produced (tens of millions of gallons annually) - unless RS is going to build a state-of-the-art treatment plant to remove PFAS, microplastics, heavy metals, etc. they are not going to alleviate this burden on the community. They will continue hauling tens of millions of gallons of leachate to municipal wastewater treatment plants where these dangerous components are NOT treated or mitigated, they enter the environment via the air, effluent to the Willamette, or via biosolids applied to agricultural fields.
 - The second problem with the rainfall and too much landfilled organic material are difficult-to-capture bursts of landfill gas which also contains PFAS and the greenhouse gas methane, amongst other things.

- The movement of leachate and landfill gas components off site – sometimes far off site – must confer adjacency to any location they reach.
 - Way down in Corvallis we smell landfill gas – either hydrogen sulfide (or mercaptans, etc.) or solvents (sweet smell – dichloroethane) or other unidentified volatilized components of landfilled materials. This gives us adjacency.
 - Anyone living near a field where Corvallis or Salem WWTP biosolids have been applied has adjacency. Any abutting property to those also has adjacency – the PFAS, microplastics, etc. do not stay put. They can contaminate wells, surface water, and groundwater. In addition, biosolids can become airborne carrying these toxic components with them.
 - Now that Corvallis has said no more leachate at our municipal WWTP and Salem heading that way, how far afield will leachate go?

These are the burdens that go unaddressed by the applicant and the staff report. The staff report has always indicated that the application seems up to snuff but has not brought an expert on board to cast a critical eye on landfill gas and landfill leachate. We know regulatory agency regulations lag behind science – in this case science that tells us we should NOT be applying biosolids to fields, underfunded and understaffed, and thus too slow to help keep us safe.

I urge you to expand the term adjacent to include those places bestowed adjacency by virtue of landfill effects. To do otherwise is incredibly unfair to area residents (and beyond) and irresponsible.

Thank you

There is no more!

Commissioners Malone, Shepherd, and Wyse,

Thank you for hearing this testimony and for serving on this board. My name is Pam Castle and I am a Corvallis resident living at 993 NW Cypress Avenue. Today I am submitting for the record the people's testimony with the signatures of 1250 community members who urge you to uphold the planning commission's careful decision to deny the application for the expansion of Coffin Butte Landfill. These 1250 people recognize the significant environmental and economic burdens the landfill presents to Benton County, to the Willamette Valley, and to Oregon.

I won't be reading the testimony letter, but I'll note that the it speaks to the codes that you must use in making your decision – it is no piece of fluff, it is serious testimony. What I do want to tell you about is how this community testimony was born, how it grew its own legs, and why that's important. I think you will find it to be in stark contrast to some things that occurred leading up to these hearings.

Why a People's Testimony Letter?

In early September, Ken Eklund and I were out talking trash with folks, as we sometimes do, and were met with a frequent request – people wanted something to sign. Something that would be sent to you to let you know about their opposition to expansion. You see, once people understand the problems with this landfill - they want to do something. But - and this is important - not everyone is able to write testimony or to speak at a hearing. Some feel too disenchanted and defeated by the process, some don't feel capable, some can't attend hearings, some don't use computers, the list is probably very long.

Given this, we decided that they were right, a people's testimony letter really should exist, so Debbie Palmer wrote a great one.

The Community Reception

I wasn't entirely sure how the testimony letter would be received in the wild, I kind of envisioned a few people wanting to sign here and there – maybe a hundred, I wasn't sure.

When Virginia Scott and I took it on its maiden voyage to a small event on September 14th, people were eager to sign it...often sighing and expressing exasperation that this issue still haunts us. We often heard sentiments like "when will they take no for an answer?" or "why is this even still up for debate?"

It was at this event that I fully realized the level of disenfranchisement and disillusionment felt by community members. I had thought that maybe it was just me and those around me who were deeply involved in this issue that felt like everything was stacked against us. These feelings are caused by many things – a lot of it by the lack of clarity in this process. There was also a feeling of being intimidated by a multi-billion-dollar company scaring people about their trash rates and where their trash would go.

The letter Grows Legs

On September 15th, my husband showed the testimony letter to some neighbors and got a few signatures when he went on his morning stroll with the guys. And then something kind of extraordinary began – it started when a neighborhood couple in their 80s, Les and Diana, asked if they could take it with them to their coffee klatch...and then to their book club...and then to their exercise class. Although they'd always opposed the expansion, they had not been involved with this issue before. Something in this letter struck a chord with them – maybe it was partly a feeling of empowerment that they could do something and partly that comfort that comes with finding people who share your worries and are doing something about it.

This kind of scenario where community members kept the letter moving and engaged others in discussion about the issue played out multiple times. Then, in what felt like a wild turn to me, people began to hear about the letter and were actively looking for it - I'd be somewhere and someone would approach me wanting to let a friend sign it, shoppers sought it out at the farmers market, and folks at the No Kings event made a beeline **straight** to our table to add their signatures.

Every Signature Represents an Important Person

It is easy to focus on the large number of signatures, but there is a real person behind every signature. When I was numbering the signatures, I found myself remembering particular people of the hundreds I've spoken with over the last 6 weeks. One of those was Elise, a girl of probably 10 years of age. As Elise listened to her mother and I discuss the issues with leachate going to municipal wastewater treatment plants, she held her hand up to contribute to the conversation. Her sincere and thoughtful insight about the broader problems with this practice of leachate distribution was incredible. When her mom signed the letter, Elise asked if she could too and of course she could - we need caring, well-informed people like her on our team. I ask that you remember Elise when you make your decision, she deserves commissioners who are as thoughtful as she is.

Grassroots, Baby

What is important to know about all of these signatures is that they are the result of community members engaging with community members – standing on front porches or sidewalks, sitting in living rooms, meeting up with friends at cafes or bridge groups. They were not the result of an email campaign, nor a text blitz, and certainly not an online forum. This is what a grassroots movement is - it is organic, it is often unexpected, it is unscripted, it is authentic, and it tells you about your community – it tells you that people care.

Wrapping it up

Now that the latest staff report seemingly discounts the vast amount of good, solid evidence against the expansion that was analyzed by the planning commission in making their thoughtful decision, people feel newly disenchanted. This was a frustration brought up by people we spoke with on the Saturday. We have a creative, engaged community with extraordinary expertise in a wide array of topics, yet the evidence they presented appears to be nearly dismissed in deference to materials provided by the applicant's paid consultants, which were often easily shown to be demonstrably deficient.

It is time to make sure that the voices of our community members are heard. On behalf of the 1250 people who signed this testimony, I urge you to use your power of discretion to deny the conditional use permit to expand Coffin Butte Landfill. People like Elise are counting on you - it is time to put a nail in this coffin.

Thank You,

Pam Castle

Honorable Commissioners Wyse, Malone and Shepherd,

We who have signed below all strongly oppose any expansion of the Coffin Butte landfill and urge you to uphold your Planning Commission's unanimous denial of LU-24-027, Republic Services' application to expand the Coffin Butte Landfill. The Planning Commission carefully considered all evidence provided by the applicant, as well as considerable testimony, and concluded *unanimously* that the application did not meet the required Burden of Proof.

The proposed expansion will seriously interfere with the character of the surrounding area and impose an undue burden on public resources, in violation of Benton County Code 53.215 (1) and (2). The applicant does not adequately address major concerns about:

- **Uncontrolled landfill gas leaks containing methane and PFAS** that threaten local and global ecosystems and community health
- **Massive quantities of leachate trucked offsite** containing PFAS and other toxic industrial chemicals that end up in our waterways and generate PFAS-laden biosolids which are spread on land
- **Potential catastrophic fire danger** from ignition sources inside and outside the landfill (after-hours/unmonitored hot loads, equipment fires) (windblown wildfire embers, lightning strikes) catching uncontrolled methane leaks on fire
- **Undue burden on local fire department health and safety** (to fight landfill fires) and community (to monitor and report fires after hours – even on red flag days)
- **Traffic increases** that pose safety risks on nearby highways, roads and bike paths
- **Odor and noise issues** that degrade quality of life for residents and visitors alike
- **Litter** on roadsides, farmers fields, pastures and other private property
- **Negative impacts on wildlife, recreation, and property values**
- **Long-term climate and environmental consequences** for future generations

The proposed expansion also does not align with *Benton County's 2040 Thriving Communities Initiative* core values. The existing landfill *already undermines* our shared goals for responsible environmental stewardship, prioritizing public health, and sustainable waste management; an expanded landfill would not change this metric.

We believe Benton County should invest in protecting its reputation for agritourism, outdoor recreation, clean air and water, high tech and higher education, not expand a landfill that is already a huge visual blight, perpetuates pollution and places a long-term burden on local communities!

Please reject LU-24-027. Thank you for your consideration and for protecting the health and future of Benton County.

Sincerely,

(names, addresses and signatures begin on page 2 of this document)
